

Please do NOT enact the proposed rule changes for charity fund raising flights (NPRM 4521). Our local museum has been conducting fund raising flights for 15+ years without incident or complaint. The funds raised are used to maintain a charitable and historical museum that promotes aviation awareness and honors the memory of our flying servicemen, many of whom died to preserve our freedom. The proposed rule changes will most likely require the museum to terminate future fund raising activities. This will deprive the public of an important historical venue and eliminate a valuable airport/aviation good will event with the public. One key role of the FAA is to PROMOTE aviation development in the USA. The NPRM 4521 works counter to this role. PLEASE DO NOT change the current requirements as proposed in 4521.
